PROFESSIONAL SUMMARY

Entry-level Security Operations Center (SOC) Analyst with hands-on experience in threat detection, alert triage, and incident response workflows. Skilled in developing automated alert management systems, threat intelligence integration, and security event correlation. Proficient in SIEM platforms, log analysis, and real-time security monitoring. Focused on reducing alert fatigue, accelerating threat identification, and supporting effective incident investigation processes.

TECHNICAL SKILLS

Security Monitoring: SIEM (Splunk, Wazuh), Log Analysis, Alert Triage, Incident Response, MITRE ATT&CK.

Networking: TCP/IP, DNS, HTTP/HTTPS, Firewall, Packet Analysis.

Operating Systems: Windows, Ubuntu Server, Kali Linux.

Security Tools: Wireshark, Burp Suite, VirusTotal, AbuseIPDB, Shodan.

Scripting: Python, Bash, PowerShell.

Workflow Automation: n8n, Make.

PROFESSIONAL EXPERIENCE

Cybersecurity Virtual Intern AICTE | Palo Alto Networks

Oct 2024 - Dec 2024

Remote

- Completed a 10-week cybersecurity virtual internship covering cybersecurity, network security, cloud security, and security operations fundamentals.
- Built foundational knowledge across security monitoring, network defense, cloud security, and SOC operations through Palo Alto Networks' cybersecurity learning program.

PROJECTS

TriageForge : SOC Alert Triage & Investigation Automation - [Github](#)

n8n Orchestration , Threat Intelligence Integration , AI Analysis

- Multi-stage threat investigation pipeline — Wazuh agents detect security events that trigger alerts in Wazuh, which are automatically ingested into TriageForge's n8n orchestration
- IOC extraction, threat enrichment (VirusTotal, AbuseIPDB, AlienVault OTX), behavioral analysis, and AI-driven recommendations within orchestrated workflows
- Slack-integrated approval workflows — real-time analyst notifications with decision routing; Supabase audit logging tracks all triage decisions and incident lifecycle from detection to closure

Splunk-Security-Monitoring-and-Detection-Lab - [Github](#)

Splunk Enterprise, Python, SPL, Security Data Analytics

- Built a hands-on Splunk SIEM lab to generate and ingest 170 synthetic Apache, authentication, and firewall security events for centralized monitoring and analysis
- Developed SPL-based security searches and detection rules to identify failed logins, brute-force attacks, suspicious s, port activity, HTTP anomalies, and privilege escalation
- Created security dashboards and automated alerts to visualize authentication, firewall, and web activity, investigate suspicious incidents, and document findings with recommended response actions

PrakashSetu: IoT-Based Smart Street Light Monitoring & Fault Detection System - [Github](#)

ESP8266, IoT, PIR Sensors, LDR, Telegram Bot

- Developed an IoT-based smart street-light system with automated day/night control, motion-based lighting, real-time fault detection, and Telegram notifications for maintenance alerts.
- Automated fault reporting and adaptive lighting to reduce manual maintenance effort and energy consumption while improving street-light monitoring and public safety.

CERTIFICATIONS & ACHIEVEMENTS

- Google AI Professional Certification – Coursera
- Google AI for App Building – Coursera
- Security Operation Fundamentals – Palo Alto Networks
- Elected Vice President of AI&DS Department (3rd Year) — Managed events, coordinated activities, and ensured smooth execution of departmental initiatives.

EDUCATION

Bachelor of Engineering, Artificial Intelligence and Data Science

2022 - 2026

MET's Institute of Engineering, Nashik, Maharashtra | CGPA: 7.3/10
